-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Art Unit: 3744

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite in line 8 in reciting that the air is discharged "into outside of the vehicle". It is unclear as to what this means.

3. Claim 6 recites the limitation "the air conditioning units" in line 3. There is insufficient antecedent basis for this limitation in the claim. Independent claim 1 recites only one air conditioning unit.

4. Claim 7 recites the limitation "the passenger door" in line 4. There is insufficient antecedent basis for this limitation in the claim. Claim 7 should depend from claim 2 instead of claim 1.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 4, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Honda. Honda discloses a plurality of discharge ducts 38 which discharge air into the rear of the passenger compartment.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3744

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Honda.

Honda discloses the claimed invention except for the discharge outlets being near a hip position of the passenger seat. The location of the discharge outlets is considered to be a matter of obvious choice to one of ordinary skill in the air conditioning art, as no criticality or unexpected results are seen or have been disclosed for the recited location of the discharge outlets being near a hip position of the passenger seat. Furthermore, one of ordinary skill in the art would be able to locate the discharge outlets near the hip area of the passenger without undue experimentation.

9. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Honda in view of Sakurai. Honda discloses the claimed invention except for the non-return valve preventing outside air from drawing into the passenger compartment. Sakurai teaches an air conditioning system for a vehicle including a non-return valve 4 which prevents outside air from entering the system. It would be obvious to provide Honda with a non-return valve, in view of Sakurai, for the purpose of preventing outside air from entering the passenger compartment whenever needed or desired.

10. Claims 2 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3744

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
